

disana

Dear disana customer,

we would like to invite you to dunk in the world of the natural textiles 2011, to learn in common all about the actual trends and streams, ideas and innovations of the next year at the InNaTex fair in Wallau.

Your disana team will show you already in August our news for the season 2011/2012. This season is dominated by bright Jacquards in modification with noble knitting. Due to new and improved cuts our products are more convenient for the children. The topics for this season are "Earth", "Sky" and "Meadow" and you will find new creations, like our boiled wool articles made of a new "summer" fabric.

In August the autumn/winter season 2011 begins which needs a good preparation. We would like to join you in with our workshop "Fit for wool". You will get all necessary information about wool and about the basics to treat the fibres. You will get answers for important questions like "how to wash woollen articles"? Are there any tips and tricks concerning the storage of woollen cloths? Is it possible to make the overpants watertight again? What should be done in case of peeling?

You will find the answers in our workshop "Fit for wool" during the InNatex.

On the back side of this invitation you will find all information for your registration.

We are looking forward to seeing you

your disana Team
